CURRICULUM

The Hoboken Preschool Summer Enrichment Program provides children with theme-based learning opportunities that incorporate both education and summer fun! The schedule includes many activities that compliment the Tools of the Mind Curriculum.

We will read and discuss theme-related children's literature in large and small groups, complete hands-on developmentally appropriate math, literacy & science activities, and continue to practice social skills, self-regulation and problem solving strategies.

In addition, we will also have morning meeting, rest time, meals, and ample time for free play, outdoor play and sprinkler time.
